

Autorun

About

Autorun allows server admins to automatically run commands when a player joins a server, either just once or a specified number of times. The commands can be configured to run for a specific player, or have it run on all player joins. The commands can be configured to run from the user, or from the console. It is an extremely lightweight, easy, yet powerful plugin used to run commands on player join.

Player vs All

- Player commands will run for a specific user only when they log into the server
- All commands will run for all users that log into the server

Execution Levels

- **Player** - Execute autorun command as if player executed it themselves
- **OP** - Execute autorun command as if player with OP permissions executed the command
- **Console** - Execute autorun command as if it were typed directly into the console. The epitome of permissions, only to be used wisely

UUID

Autorun is 100% UUID compliant, using player's UUID's for identification, rather than their usernames. When Mojang allows players to begin changing their usernames, Autorun commands will still execute for the same player, regardless of username changes, as all data is stored with their UUID's.

Setup, Config & Commands

Stats & Updates

- Autorun implements a update checker to automatically check Bukkit for updates. [More Information](#)
- Autorun implements metric reporting to report information about plugin usage to mcstats.org [More Information](#)
- Autorun notifies you if the developer joins your server. You can easily disable this in global.yml

Featured Servers

- Coming Soon!

Future Development

- In all-player commands, you can use "@player" which will replace it with the user's username when executing the command
- Commands can be figured to run after a specified amount of time after a player joins a server
- Commands can be figured to run every so often (specified amount of seconds, minutes, hours, etc)
- For updates, or just to say hi, follow me on [Twitter](#).

Future feature "command after a specified amount of time" sounds good!
